

Project Title:
REACHING CONSENSUS AMONG UBC DENTISTRY FACULTY AND STUDENTS ON BASIC BIOMEDICAL SCIENCE LEARNING OBJECTIVES

Project Summary *(150 words maximum)*

The main purpose of this project is to identify the foundational biomedical sciences learning objectives required for new graduates of the UBC Dentistry program by surveying UBC dental students and faculty. The Delphi Method will be employed to facilitate reaching a 75% consensus among panelists within each of the 13 courses reviewed. Survey results will influence immediate and future curriculum design to improve learning for all 4 years of dental students.
